

PRESS RELEASE

INFASSURE ACQUIRES DATA CABLING FIRM, OFFERS CONVERGED PHYSICAL AND LOGICAL SECURITY TECHNOLOGY TO PROTECT CORPORATE ASSETS

Richardson, TX, United States, 1/30 /08 – Intero brings expertise in Access Control, Surveillance, Datacenter Design, Digital Signage and Voice/Data Cabling

Infassure today announced that it has acquired the assets of Intero Communications, a 5-year old Dallas firm with expertise in Access Control, Surveillance Systems, Datacenter Design, Digital Signage and Voice/Data Cabling. Intero's customers include major north Texas companies across a wide range of industries including manufacturing and distribution, hospitality, banking, retail and food service.

Jamie Thomas, Intero CEO, will serve as General Manager of Infassure's LinkAssure business unit. Mr. Thomas has 17 years experience in IT management and network infrastructure design and implementation. He has designed enterprise class data centers for publicly-traded manufacturing companies. For a printed circuit board manufacturing company, Mr. Thomas consolidated 19 global IT operations into a single operation while managing infrastructure supporting more than 2,000 desktops and engineering workstations.

According to Tim McDonald, Infassure's Founder & CEO, "Intero is a logical addition to our company. Leveraging the OneAssure single vendor concept, LinkAssure gives our customers access to best-in-class data cabling services as well as physical plant security systems such as access control and surveillance. We are excited to have someone of Jamie's caliber join our team."

About Infassure

For 22 years, Infassure has provided its customers with cost effective information technology solutions that make them more competitive while lowering their technology costs. While most IT services vendors specialize in a single technology discipline which forces customers to engage with multiple partners in a single project, thereby increasing costs, complexity and risk, Infassure eliminates those issues with OneAssure.™ Infassure's OneAssure™ single vendor concept leverages best-in-class technologies from industry leaders such as Microsoft, HP, Cisco and CA to deliver solutions that work from five interlinked practices: Collaboration; Customer Interaction Management; Enterprise Resource Planning; Managed Services; Mobility.
